# STUDENT DASHBOARD

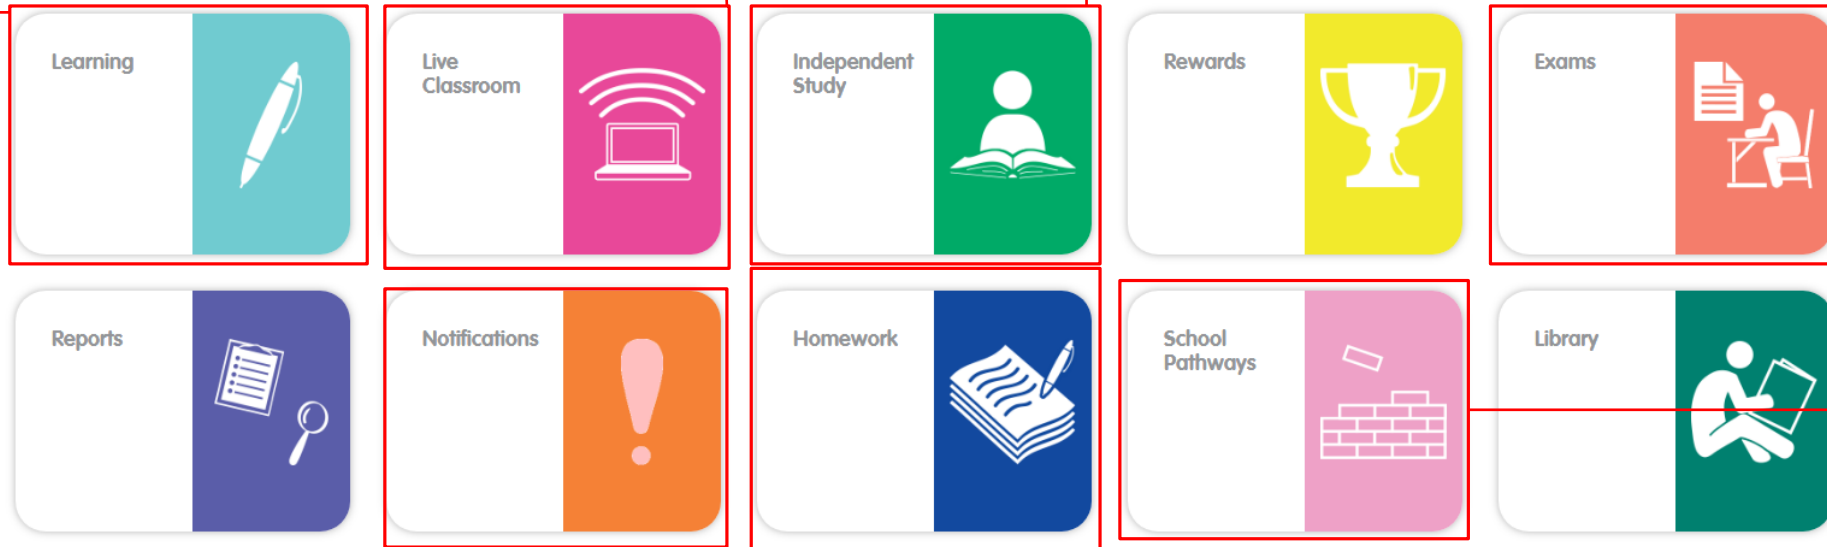

This allows them to select their own lessons in a bank of subjects.

This allows them to access the offsite classroom

This gives them access to any exams assigned to them.

This will allow them to access their pathways

This allows them to access any marking feedback

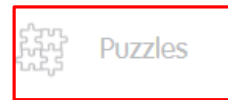

This allows them to access any homework assigned to them

This is where you can view pathways which you've been assigned

This button takes them back to their dashboard.

Calendar

Social

My Folder

Timetable

This allows them to access the games. They need EDDollars to play

This is how many EDDollars the student has. They gain these by going through lessons.

This allows them to send and receive messages from your staff/ teachers

Similar to games, this gives them access to puzzles

This logs the student out of the system.

If the student needs any more support they can select these and it will give them guidance with the system.

This allows the student to report any bugs to us.

This is viewed on a regular basis.

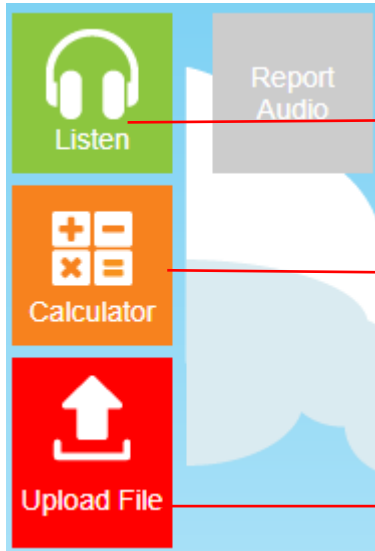

A screenshot of a web form titled 'Report Technical Issue' in a blue header bar with a close button (X) on the right. Below the header, there is a warning message: 'Please do not abuse the bug report form. The use of foul and abusive language will be dealt with accordingly.' Underneath the warning is a text input field labeled 'Description'. At the bottom of the form, there is a 'Submit bug report' button. A red arrow points from the text above down to the top of the form.

Students can customise their screens by changing their slide colour, text, font and font size.

Once they have completed their lesson, they need to press 'save and exit'

This allows them to listen to the text on the slide. (And report it if it is incorrect)

They can use a calculator in some lessons

Students can upload word documents etc for us to view within their marking.
